Flow charts

Read each scene and build its flow chart from the shapes on your tray. Pencil first, one action in each shape, and show your teacher before you glue anything down.

Shapes

Terminator

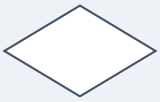
Where the chart starts and where it ends.

Process

One action the chart does.

Input / output

Asks for information, or gives information out.



Decision

Asks a question. Each answer leaves by its own arrow.

Arrow

Joins one shape to the next and points at the step which comes next.

Branch chips

Stick YES or NO on an arrow which leaves a decision.

Task 1 — School radio intro

INT. RADIO ROOM, MORNING

The school radio station records its own intro before a five-minute show goes out.

Priya holds a printed script at the desk while Sam hands over the mic.

SAM
You're live in a moment. Read your words first and check they are right.

PRIYA
You're listening to Northgate Radio. That was our intro.

SAM
Good. Press record and say it again, but louder this time.

The red light comes on. Priya reads from the paper and speaks into the mic while Sam counts her in.

TECHNICAL Fade the music quietly under her voice.

Task 2 — Ticket machine

INT. STATION TICKET MACHINE, LATE AFTERNOON

Freya and Dev stand at the platform ticket machine after the last lesson, each needing a single for the match.

Dev holds a tin of coins while Freya reads the screen out loud.

DEV
Tap the screen and choose the ticket you want.

FREYA
One single to Northgate, leaving just after school. It is on the screen now.

DEV
Put the money in and let the machine check whether it covers the fare.

Freya drops coins into the slot and the screen holds on that question for a moment.

FREYA
When the fare is covered it prints the ticket and you walk straight through the barrier.

DEV
Today it is short, and the machine asks you for more money before it stops.

The screen keeps its request while Freya takes her coins back and walks off towards the staffed desk.

TECHNICAL Run a platform announcement quietly beneath their exit.

Task 3 — Museum decades

INT. SCHOOL LIBRARY, LUNCHTIME

Maya and Tomasz are testing the virtual museum about their town, which they are building in a virtual box with one room for each era.

Tomasz sits at the laptop while Maya reads the plan from her notebook.

MAYA
A visitor walks in at the entrance and types the year they want to explore.

TOMASZ
If the year is before 1980 they go straight into the 1970s room.

MAYA
Anything later gets a second look. If it is before 2000 they see the 1990s room, and everyone else gets the modern room.

TOMASZ
Every visit finishes at the exit, whichever room they were in.

The three doors on the screen glow in turn while Tomasz clicks through each route.

TECHNICAL Play a soft footstep sound as each door opens.

Task 4 — Video export

INT. EDIT SUITE, AFTER SCHOOL

Jas and Kofi have finished a ninety second trailer for the school film club and need to email it to the teacher.

Kofi hovers over the export button while Jas reads the email limit from the screen.

JAS
Pick the export format first, then the editor checks whether the file is small enough for email.

KOFI
Too big and it squeezes the video harder, then it checks the size all over again.

JAS
It keeps squeezing until the file is small enough. Then it saves the file and we are done.

A progress bar fills, empties and fills again on the screen while Kofi counts the passes under his breath.

TECHNICAL Add a quiet click to the soundtrack each time the bar restarts.

Task 5 — Hide and seek

INT. GAMES LAB, THURSDAY

Ines and Ravi are playtesting their Hide and Seek prototype, where the player hunts for a cat hidden in one of the rooms.

Ravi holds the controller while Ines watches the screen with a pen over her plan.

RAVI
The game starts by giving the player three lives. Then the player picks a room.

INES
If the cat is in that room we show the win screen and the game finishes.

RAVI
If it is not there the player loses a life. With any lives left they pick a room again.

INES
With no lives left we show the game over screen and the game finishes there.

Ravi picks wrongly twice in a row and the life counter on the screen drops from three to one.

TECHNICAL Play a sad trombone note each time a life is lost.
